	Human papillomavirus (boys only 2014)	3 doses – 0, 2 and 6 months

- Students who miss any doses of vaccine at school are eligible to receive their missing doses up to the end of the following year. Vaccinations not completed in this time frame will need to be purchased with private prescription
- Adolescents not attending school who would normally be in either Year 8 or Year 10 are eligible for the vaccinations above
- Vaccinations administered by a practice/clinic to school age adolescents must be recorded in the usual way and forwarded to Queensland Health, VIVAS, REPLY PAID 2368, FORTITUDE VALLEY BC QLD 4006

National Immunisation Program Schedule Queensland

March 2014

The NIP schedule

- Important Schedule changes include:
 - Two doses of MMR containing vaccine are recommended for all children. The first dose should be given at 12 months of age as MMR vaccine. The second dose should be given at 18 months of age as MMRV vaccine. **Do not give MMRV vaccine as the first dose of MMR containing vaccine in children less than four years of age**
 - Children who have already received their 18 month old varicella vaccination should still be given their second dose of MMR vaccine at the 4 year old schedule point
 - Hepatitis A vaccination for Aboriginal and Torres Strait Islander children will commence at 12 months with the 2nd dose of hepatitis A due at 18 months
 - You may receive different brands of the same vaccines to administer in the schedule
 - “Catch-up” now refers to children aged <10 years of age
 - In 2014 diphtheria, tetanus and pertussis vaccination will be offered to all Year 8 students
 - Please refer to The *Australian Immunisation Handbook 10th Edition 2013* for the most up to date information online at www.immunise.health.gov.au/internet/immunise/publishing.nsf/Content/Handbook10-home
